(P) Paper. *Dynawad®

- (a) Shotshell length = full length of shell when crimp has been opened out. Do not use a shell longer than the chamber of your gun.
 (b) Number of pellets by actual count.
 (c) 'Poly-Kor' Slug & Rifled Slug Loads are packed 5 to a box and 500 to a case. All other shotshells are packed 25 to a box and 500 to a case.

Table of Standard Shot Sizes

Dynawad®, a new plastic wad system

(with twin gas seals)
that delivers dynamic power,
perfect patterns, consistent bal-
listics, shot after shot after shot.

a lightweight shot protector
(with gas seal)
to shield the pellets in their bruising path down the barrel and to
concentrate the shot into a uni-
form pattern.

a lightweight wad column
(with gas seal)
compressible and resilient to
cushion shoulder recoil while
still improving hitting power and
pattern.

a lightweight wad system with
heavyweight performance.

Dynawad®: available in shotshells coded IL, IT, IM, PX, IP, LX,
DN, DA, JX, JXP and JM in regular shot sizes only.

ST

'Imperial'
centre fire
bullet types

'SabreTip': A thick-jacketed bullet with a tough, durable tip that will not deform on feeding. Unique construction ensures smooth chambering, excellent expansion and fine accuracy. One of the best bullets for big game hunting in North America.

KKSP

'Kling-Kor' Soft Point: Unseen notches securely grip bullet core; act as barbs to arrest any tendency to strip or disintegrate on impact with target. Thin tongues of lead extruded through notches provide locking action at exact moment it is most needed.

PSP

Pointed Soft Point: High velocity and flattened trajectory reduce sighting problem. Accurate with excellent mushrooming qualities.

Range Table

Values shown in this table are based on a sight height 1½" above line of bore

Comparative Performance: figures below are for a sight-setting of 100 yards and permit a comparison of trajectories up to 200 yards.

RECOMMENDED SIGHTING: \oplus Indicates the most favourable sighting range in order to minimize the sighting problem at shorter and longer ranges.
 $+$ Indicates inches high; $-$ indicates inches low.

SP

Soft Point: Jacketed in metal with a round or flat lead nose, the Soft Point is a dependable favourite for the lower velocity calibres.

CPE

Copper Point Expanding: Special nose construction provides excellent penetrating and mushrooming qualities. Sustained high velocity reduces problem of range estimation and sight adjustment. A favourite in open country.

PNEU

Pneumatic: Enclosed air pocket and specially designed jacket promote rapid mushrooming and shocking power.

MC

Metal Cased (Hard Point): For maximum penetration without mushrooming to avoid spoiling the pelts of valuable fur-bearing animals.

'Sabretip' bullets

'Sabretip' bullets combine the excellent performance of soft point bullets with the smooth functioning and resistance to tip damage of hard point bullets. Rough handling, recoil in magazines, even feeding through military type actions can't damage the 'Sabretip' point. It is smooth feeding, flat shooting, deadly accurate and mushrooms as effectively as a soft point bullet, at all hunting ranges. Extensive field and laboratory tests have proved it to be one of the best bullets for big-game hunting in North America. Imperial 'Sabretip' bullets are available in .270 Win., 7mm. Rem. Mag., .30-30 Win., .30-06 Spring., .300 Win. Mag., .300 Sav., .303 Br., .308 Win., .32 Win. Spec.

Range Table

Values shown in this table are based on a sight height 1½" above line of bore

Comparative Performance: figures below are for sight-setting of 100 yards and permit a comparison of trajectories up to 200 yards.

RECOMMENDED SIGHTING: \oplus Indicates the most favourable sighting range in order to minimize the sighting problem at shorter and longer ranges.
+ Indicates inches high; - Indicates inches low.

IMPERIAL 'Kling-Kor' Soft Point Bullets were developed by CIL to solve a problem which had plagued ammunition makers for years.

The Problem: How to prevent bullet jackets from separating from their lead cores at impact.

The Solution: A series of notches (hidden under the case neck) ringing the jacket which securely rivet the lead core and copper alloy jacket together. These notches act as claws to arrest any tendency to strip or disintegrate on contact with the target.

IMPERIAL 'Kling-Kor' Bullets are available in 270 Win., 7 x 57 mm Mauser, 30-30 Win., 30-06 Spring., 300 Sav., 303 Sav., 303 Br., 308 Win., 32 Win. Spec., 32 Rem., 32-40 Win.

Components

CIL makes available a complete line of quality, hand-loading components. For retail price guide contact your nearest CIL component dealer or write Canadian Industries Limited, Sporting Arms and Ammunition, P.O. Box 10, Montreal 101, Que.

CIL

Shooting Sports Program

Shooting ranks among the best organized sports in Canada. Regulating bodies at the national, provincial and municipal levels operate tournaments, leagues and postal competitions the full year 'round under an international classification system. Boy Scouts, civic and service clubs, veterans' organizations, police and fire departments, churches, community recreation departments, gun clubs, conservation groups — these and many other notable organizations sponsor shooting programs.

Supplementing these many activities, and of particular interest to the new or non-competitive shooter, the CIL Shooting Sports Program offers handsome rating awards in rifle, handgun and shotgun shooting. For full information on the CIL competitions, helpful literature and motion picture films, write to:

CIL Shooting Sports Program
P.O. Box 10, Montreal 101, P.Q.

Targets

CIL also supplies three targets for sighting-in rifles and informal shooting:

CIL 100 yard Sighting-in Target packaged	
50 per envelope	\$34.00/1,000
CIL 25 Yard Practice Target packaged	
500 per mailing carton	\$ 6.00/1,000
CIL Good Luck Target packaged	
500 per mailing carton	\$ 5.00/1,000

Official competition targets, for use at a variety of ranges with small bore rifles and handguns, are available from the Shooting Federation of Canada, 333 River Road, Vanier, Ont. K1L 8B9. Write to the Shooting Federation of Canada for information and prices, and for details of their nationwide shooting programs.
